1- FUNCTION: OMPF IS A PORIN THAT PASSIVE DIFFUSION PORES WHICH SMALL MOLECULAR WEIGHT HYDROPHILIC MATERIALS ACROSS THE OUTER MEMBRANE. IT IS ALSO RECEPTOR FOR THE BACTERIOPHAGE T2.

1- SUBUNIT: HOMOTRIMER.

1- SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN. OUTER MEMBRA.

1- SIMILARITY: BELONGS TO THE OMPC/PHOE FAMILY OF PORINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SEQUENCE OF 23-34 AND 39-47.

"Characterization of the Salmonella typhimurium phoE gene and
development of Salmonella-specific DNA probes.";

Gene 122:45-52(1992).

-I- FUNCTION: THIS IS ONE OF THE PROTEINS INDUCED WHEN CELLS ARE
GROWN UNDER PHOSPHATE LIMITATION. ITS PROTEIN PORE IS

PARTICULARLY EFFICIENT IN THE UPTAKE OF INORGANIC PHOSPHATE,
PHOSPHORYLATED COMPOUNDS, AND SOME OTHER NEGATIVELY CHARGED
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Salmonella typhimurium.
